MATHS:
We have started to look at division using patterns and links with multiplication. We have just begun to solve division calculations as repeated subtraction using number lines. We will move on to solving division and multiplication word problems.

SCIENCE:
We have been looking at the different types of skeletons; exoskeletons, endoskeletons and hydrostatic skeletons and talking about which skeleton particular animals have. We have begun looking at the human skeleton and where certain bones are in the body.

GAMES/PE:
In games we will be continuing with Orienteering in the school grounds as well as doing the Golden Mile. In PE we will be continuing to use the apparatus in Gymnastics.

DEADLY 60

Fortnightly Focus

YEAR 3 – 12.10.18

NEWS:
Please ensure that children have their PE kits (including trainers) and planners in school every day.

Please remember to record your child's reading at least 4 x weekly and sign their planner at the end of the week. Thank you.

Planners MUST be in school every Monday and Friday and Homework books every Friday.

Library day is MONDAY

ENGLISH:
The children have nearly completed their non—chronological reports of their fictional deadly animal so are in the process of publishing it. Children will present their report as part of a class non-fiction book. Children will then spend time looking at Poetry before half term.

ART:
Children have designed an animal print to go with their created animal and have used polystyrene tiles to print the pattern using 2 or 3 colours.

RE:
The children have been looking at the festival of Diwali, learning how Hindus celebrate this. They have been discussing the concept of good overcoming bad.

COMPUTING:
We will be continuing to learn about staying safe online, as well as using Pivot to create an animation.
